ADVANCED ANALYTICS

Automation Intellect is excited to announce an upgrade to our **Advanced Analytics Reporting Tool**.

Use the Advanced Analytics tool to look for patterns, make deeper discoveries and uncover opportunities. Empower more employees to make better decisions daily, creating a data-driven manufacturing enterprise.

Over the next weeks and months we will be delivering more subject matter dashboards including Plant Management, Product Management, and more.

Insight

This machine has excessive ChangeOvers and has 65 minutes downtime per day in the average. You can easily improve effectiveness of this machine. [Learn how](#)

- Overview
- OEE
- Production
- Faults

- Station View
- Notification
- Document
- Advanced Analytics

PRODUCTION

OEE is decreasing. This is driven primarily by excessive product changeovers. [Get more data on product changeovers](#) and learn how to facilitate production.

FAULTS - TOP 10

Fault 55 is occurring more frequently and has caused 5 downtime events in the last 7 days. [Move to Fault 55](#)

INSIGHTS

Automation Intellect gets smarter. You'll see **Insights** throughout the application, giving you fast and easy understanding of what action you should take.

Behind the scenes, Automation Intellect searches for anomalies, surfaces issues that need attention and makes recommendations for improvement. New insights will be delivered each month. Have an idea for a new insight? Speak with your assigned Customer Success Manager at Automation Intellect!

INLINE MANUAL

Get product help in our platform, while you're using it, with our **Inline Manual**.

Look for the question mark in the lower left corner that will pop up a window with help options. Click on the topic you need help with to view a dropdown of additional options.
